

MADE

MED SPA

Getting Found on Google

A practical guide to local SEO for a new med spa in McLean. The things you can do yourself, the things that actually move the needle, and the things to skip.

April 2026

FOR KARLYNE • NO MARKETING JARGON

How Google Decides Who Shows Up

When someone in McLean types *"botox near me"* into Google, three things decide whether MADE shows up: **relevance**, **distance**, and **prominence**. You can't change distance — but the other two are entirely in your hands.

Relevance

Does your site clearly mention the service the person searched for? If your Botox page just says "neurotoxin" in clinical language, Google may not connect it to the word "Botox." If your site never mentions McLean, Tysons, or Vienna by name, Google won't know you serve those areas.

Distance

Google measures how far you are from the searcher. McLean (22101 / 22102) is your anchor. You'll naturally rank best for searches happening close to your address.

Prominence

How well-known and trusted you are online. Reviews, mentions on other websites, social media presence, photos uploaded to Google — all of these tell Google "this is a real, busy, trusted business."

The headline: as a brand-new business, you start with zero prominence. The next 6 months are about building it. Everything in this doc points toward that.

Google Business Profile DO THIS FIRST

This is the single most important thing on this list. Your Google Business Profile (GBP) controls whether you appear in the “map pack” — the three results with photos and pins that show up at the top of any local search. For med spas, the map pack drives more bookings than the regular search results below it.

Set it up properly

- 1 Go to google.com/business and claim “MADE Med Spa”
If a placeholder listing already exists, claim it. Don’t create a duplicate.
- 2 Use your exact business name, address, and phone — spelled identically to the website
Even “Suite” vs “Ste” matters. Google notices.
- 3 Pick the right primary category: **Medical Spa**
Then add secondary categories: Skin Care Clinic, Laser Hair Removal Service, Wellness Center
- 4 Add every service you offer, with prices where possible
Pull straight from your service menu — Botox, fillers, Aerolase, microneedling, etc.
- 5 Write a compelling business description (~750 characters)
Mention McLean, the surrounding areas, your nurse credentials, and that you treat all skin types
- 6 Set your hours (must match the website)
- 7 Upload 15+ photos: storefront, lobby, treatment rooms, your headshot, products
Add new photos every 1–2 weeks. Google rewards active profiles.

Then keep it alive

- ☐ Post a Google Business update once a week
A new product, a special, an educational tip — anything counts
- ☐ Respond to every review within 48 hours
Both 5-star and any negative ones. Google watches response rate.

- ☐ Add new photos regularly
Behind-the-scenes, treatment room, before-and-after (with consent)
-

- ☐ Ask every happy client to leave a Google review
Reviews are the #2 ranking factor after the profile itself

Quick win: after each new client visit, text them a direct link to leave a Google review. Your goal for month one is 10+ reviews. Most local searches show businesses with 4.5+ stars and 25+ reviews above businesses with fewer.

Keywords You Should Target

These are the actual phrases people type into Google when looking for what you offer. You don't need to rank for all of them — you need to rank for the right ones. Below: the searches that fit MADE specifically, organized by intent.

Tier 1 — High-Value Local Service Searches

These are the bread-and-butter searches that drive bookings. Start here.

INJECTABLES botox mclean · botox tysons · botox arlington va	INJECTABLES lip filler mclean · dermal fillers tysons
INJECTABLES sculptra northern virginia · jawline filler mclean	SKIN microneedling mclean · rf microneedling tysons
SKIN hydrafacial mclean · medical facial tysons	SKIN chemical peel mclean va
LASER laser hair removal mclean	LASER aerolase mclean · neoclear acne treatment
WELLNESS iv therapy mclean · iv drip tysons	WELLNESS semaglutide mclean · weight loss injection nova
LOCAL INTENT med spa near me (when in McLean)	LOCAL INTENT med spa mclean va

Tier 2 — Differentiation Keywords (Your Edge)

What makes MADE different is your edge. Aerolase is one of the few lasers genuinely safe for all skin tones. That's a huge SEO opportunity.

SKIN TONE laser hair removal dark skin mclean	SKIN TONE melasma treatment northern virginia
--	--

SKIN TONE

hyperpigmentation treatment for women of color

SKIN TONE

safe laser for black skin virginia

NICHE

razor bumps treatment mclean

NICHE

black-owned med spa northern virginia

PRACTITIONER

nurse injector mclean

PRACTITIONER

female injector tysons

Tier 3 — Educational Long-Tail Searches

People asking questions before they book. These are great for FAQ content on the site.

how much does botox cost in northern virginia

is aerolase safe for dark skin

what's the difference between prp and prf

how long do lip fillers last

does microneedling work on acne scars

best treatment for melasma on black skin

How to use this list: on every service page in your admin panel, make sure the page mentions the service AND the location naturally in the description. Not stuffed — written. "Our Botox treatments in McLean are designed for..." reads better than "Botox McLean Botox Tysons Botox Arlington."

On-Page Wins You Control in Admin

FOUNDATION

Every page on the site has fields you can edit through your admin panel. Filling these out properly is one of the highest-leverage SEO moves you have.

Page titles & meta descriptions

The page title is what shows up as the blue link in Google search results. The meta description is the gray text underneath it. These are your billboard. Write them to *sell the click*.

× GENERIC

Title: Services | MADE Med Spa

Description: Welcome to our services page.

✓ SPECIFIC & CLICKABLE

Title: Botox & Fillers in McLean, VA | MADE Med Spa

Description: Natural-looking Botox, fillers, and skin treatments in McLean. Nurse-led, all skin tones welcome. Book your consultation today.

Image alt text

Every photo you upload should have descriptive alt text. Google can't see images — it reads alt text. It's also how visually impaired clients use the site.

× SKIP ALT OR USE THE FILENAME

IMG_4837.jpg or (blank)

✓ DESCRIPTIVE

Aerolase laser hair removal treatment at MADE Med Spa in McLean

Service descriptions

Your service descriptions in admin do double duty — they're for clients and for Google. Aim for 150–300 words per service. Mention the treatment name, a related synonym, and a location reference at least once.

Mention your service area in copy

The footer of the site, the about page, and the contact page are great places to naturally name the areas you serve.

EXAMPLE FOOTER LINE

Proudly serving McLean, Tysons, Vienna, Arlington, Falls Church, Great Falls, and the greater Northern Virginia area.

Reviews & Listings

After your Google Business Profile, reviews and consistent listings across the web are the next biggest ranking factor for local search. Both compound over time.

Reviews: build a flywheel

- ☐ Text every happy client a direct review link within 24 hours of their visit
Strike while the experience is fresh. Same-day works best.
- ☐ Use a short, friendly script — not corporate
“Hi Sarah! So glad you came in today. If you have a moment, a quick Google review means the world to a small business like ours: [link]”
- ☐ Respond to every review — positive and negative
Thank positives by name. Respond to negatives professionally without defensiveness.
- ☐ Spread reviews across platforms: Google first, then Yelp, then RealSelf
Don't ask 50 people for Yelp reviews in a week — Yelp filters those

Listings to claim (in this order)

A “citation” is a mention of your business name, address, and phone on another website. They tell Google your business is real and consistent. The directories below carry the most weight for med spas specifically.

DIRECTORY	WHY IT MATTERS
Google Business Profile	The single most important listing on the web
Yelp	Second most-trafficked review site for local services
RealSelf	The major aesthetic-specific review platform — clients research here
Healthgrades	Health-adjacent authority signal for nurse-led practices

DIRECTORY	WHY IT MATTERS
Apple Maps / Apple Business Connect	Owns Siri, iPhone Maps, and a third of mobile search
Bing Places	Smaller traffic, but free and 5 minutes to set up
Nextdoor (Business)	Hyper-local; McLean residents heavily use Nextdoor
Facebook Business	Citation value plus a place to run ads later
American Med Spa Association directory	Industry-specific authority signal
McLean / Tysons Chamber of Commerce	Local link & networking; counts as a high-trust citation

Critical rule — NAP consistency. Your business *Name*, *Address*, and *Phone* must be spelled identically everywhere. Even “Suite 200” vs “Ste 200” counts as a mismatch. Decide on the official version once, then use it on every directory.

Turning @nursekarlyne Into Site Traffic

Your Instagram presence is already growing. Here's how to point that audience — and the SEO benefit it creates — back at the website.

Quick wins on the Instagram side

- ☐ Set the bio link to mademedspa.com (or a specific page)
Use a tool like Linktree or Beacons to host multiple destinations — book, services, shop

- ☐ Mention “McLean” or “Northern Virginia” in your bio
Helps people in your area find you on Instagram itself

- ☐ Tag @mademedspa (the business account) in every personal post
Two accounts feed each other; followers find both

- ☐ End educational reels/posts with “Book at mademedspa.com”
Most viewers won't click the bio — they need a verbal CTA

Why this helps your SEO (the indirect win)

Instagram links don't directly pass “link juice” the way a backlink from a news site would. But Instagram still helps in two big ways:

- ☐ It drives **branded searches** — people Googling “Nurse Karlyne” or “MADE Med Spa McLean”
Branded search volume is one of the strongest signals Google uses to evaluate prominence

- ☐ It builds **credentialed personal authority** — you on camera, explaining treatments, with BSN/RN behind your name
For health/medical content, Google heavily favors verifiable practitioner expertise

Content that works double duty

The educational content you're already making for Instagram is gold for the website too. Consider:

- ☐ Pinning your top 5 educational reels to your IG profile

First impression matters — new visitors see “expert”

- ☐ Embedding selected reels on relevant service pages

Adds depth and dwell time, both ranking signals

- ☐ Repurposing a reel transcript as an FAQ answer on the site

Same content, two places, both work for you

Do You Need a Blog?

Short answer: not really, and we're not building one. Here's why — and what to do instead.

Why we're skipping a blog

A blog only works if you publish good content consistently — minimum twice a month, every month, for a year before SEO results kick in. That's a part-time job. Most med spa blogs end up with three abandoned posts from launch and look worse than no blog at all.

What we're doing instead

Rich service pages

Each major service page on the site is structured like a mini-article: the treatment, who it's for, what to expect, common questions. Google rewards depth on service pages even more than on blog posts, because they show clear commercial intent.

A robust FAQ section

Every question a client has ever asked you in person is a question someone is Googling. Add them all to the FAQ section — this is admin-editable, takes 2 minutes per question, and ranks for the "Tier 3" long-tail searches on the keyword page.

Real client photos & testimonials

Original images and authentic testimonials on the site are stronger SEO signals than any blog post. They prove this is an active, real practice. Add new ones as you collect them.

If you ever change your mind on a blog, we can add one. But the bar should be: you're willing to commit to one post a week for at least 6 months. Anything less and we're wasting effort.

Earning Backlinks (Without an Agency)

A “backlink” is when another website links to yours. Google treats these like votes of confidence — the more reputable sites that link to MADE, the more Google trusts you. You don’t need 100. You need 10–20 good ones.

Easy first backlinks (do these in month one)

- ☐ McLean Chamber of Commerce membership listing

- ☐ Tysons Regional Chamber listing

- ☐ Aerolase’s “find a provider” directory
Email Aerolase — manufacturers usually love listing their providers

- ☐ SkinPen, Galderma, Allergan, Merz provider directories
Same as above — most product brands maintain these

- ☐ Yelp, RealSelf, Healthgrades profile links (count as citations and backlinks)

- ☐ Your LinkedIn personal page linking to mademedspa.com

- ☐ Local business directories: Northern Virginia Magazine’s online directory, Washingtonian’s health directory

Higher-effort backlinks (months 2–6)

- ☐ Cross-promote with complementary local businesses
Hair salons, dermatologists, plastic surgeons, fitness studios, wedding planners. Mutual referral page = mutual backlinks.

- ☐ Get featured in a local lifestyle blog or podcast
McLean Today, Northern Virginia Magazine online, local women-in-business features

- ☐ Speak at a local event or chamber meeting
Event recap posts almost always link back to speakers

- ☐ Sponsor or donate to a local charity event
Sponsor list pages typically include a backlink

- ☐ Pitch yourself for “black-owned business” or “women-owned business” features

Local DEI directories actively seek listings — you fit the profile

What to ignore: any agency emailing you offering “100 backlinks for \$200.” They’re scams — spammy backlinks now actively *hurt* rankings. Quality over quantity, every time.

Your First 90 Days

A realistic, prioritized rollout. Don't try to do everything in week one.

Days 1–7 — Foundation

- ☐ Claim & fully complete your Google Business Profile

- ☐ Submit Yelp, Apple Maps, Bing Places, Facebook Business listings

- ☐ Add Google Analytics & Google Search Console to the website
We'll set these up together — takes ~15 minutes

- ☐ Update Instagram bio with website link & McLean location

- ☐ Edit footer copy to name your service areas

Days 8–30 — Reviews & service pages

- ☐ Set up an automated text-message review request after every appointment

- ☐ Aim for 10+ Google reviews in the first month

- ☐ Edit the page title & meta description on every page using the formula in this doc

- ☐ Write 150–300 word descriptions for your top 8 services
Botox, fillers, microneedling, laser hair removal, hydrafacial, IV therapy, GLP-1, Aerolase

- ☐ Add 10+ FAQs based on real client questions

- ☐ Submit your business to RealSelf, Healthgrades, Nextdoor

Days 31–90 — Build authority

- ☐ Post on Google Business Profile weekly

- ☐ Continue review flywheel — goal: 30+ Google reviews by day 90

- ☐ Email manufacturers (Aerolase, Galderma, Allergan) to be added to provider directories

- ☐ Join McLean & Tysons Chamber of Commerce

- ☐ Pitch one local feature (Northern Virginia Magazine, McLean Today, etc.)

- ☐ Cross-promote with one local complementary business

- ☐ Add 2–3 client testimonials (with permission) to the testimonials section

Reality check on timing: SEO is a 6–12 month game. You won't rank #1 for "botox mclean" in week three — that spot belongs to a business with five years of reviews. But by month 6, with consistent execution of this plan, you'll be in the conversation.

How to Tell If It’s Working

A few simple things to watch. Don't obsess over rankings — obsess over these.

METRIC	WHERE TO FIND IT	TARGET BY MONTH 6
Google Business Profile views	Inside your GBP dashboard	1,500+ / month
"Direction requests" from GBP	GBP dashboard	30+ / month
"Phone calls" from GBP	GBP dashboard	20+ / month
Google reviews (count + avg rating)	Your GBP listing	30+ reviews, 4.8+ stars
Website visits from organic search	Google Analytics	500+ / month
Bookings sourced from website	Pabau / your booking system	Trending up month-over-month

The only metric that pays bills is bookings. Rankings and traffic are leading indicators — but if visits are growing and bookings aren’t, the issue isn’t SEO, it’s the booking page experience or the offer. Watch both.

If You Only Do Five Things

The prioritized short list. If life gets busy and you can only manage five, do these.

1 **Claim and obsess over your Google Business Profile.**

Photos, posts, reviews, responses. Weekly attention.

2 **Build a Google review flywheel from day one.**

Text every happy client a review link within 24 hours of their visit.

3 **Write real, specific service descriptions on the website.**

Mention treatment + location. 150+ words per service.

4 **Get on the major directories: Yelp, RealSelf, Healthgrades, Apple Maps, Bing.**

Identical name, address, phone everywhere. One afternoon.

5 **Use Instagram to drive branded search.**

Bio link to website. Verbal CTA in every educational reel. Tag the business account.

Final note. The med spas that win at local SEO aren't the ones with the slickest websites or the biggest agency budgets — they're the ones who consistently do the basics for 12 months. You have the credentials, the service menu, and the personal brand to win this. The site is the foundation. Everything else is execution.

MADE Med Spa — Getting Found on Google

April 2026 • Local SEO Guide for a New Med Spa in McLean

◆ Custom-built with care ◆
